## Corner Protectors by Logistick

Corner Protectors have been on the market for over 30 years reducing strap damage and stabilizing loads resulting in fewer damage claims that in turn increase profits and reduce customer concerns. Corner Protectors can increase your warehouse space allowing more room to expand manufacturing or increase profits by maximizing utilization of ceiling height in warehouses. When looking at reducing costs in boxed items, Corner Protectors can help to increase box strength and even reduce packs to trays or to clear view packages resulting in lower costs and less packaging material to dispose of. Corner Protectors can be printed to increase company awareness, provide instructions, even replace labels. They are available in leg sizes of 1.5" to 4" and calipers of .06 to .500 to fit your needs. Offset legs are also available in 1x3, 2x3 and 2x4 inch sizes in lengths from 2.5 inches to 16 feet.

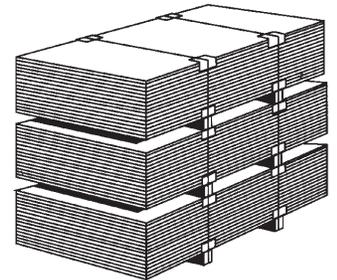

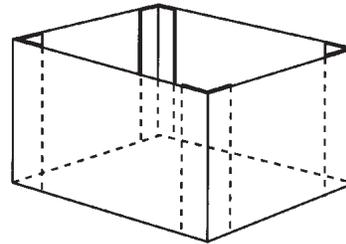

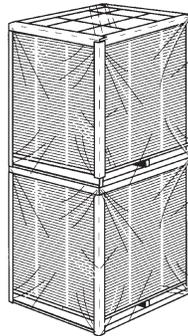

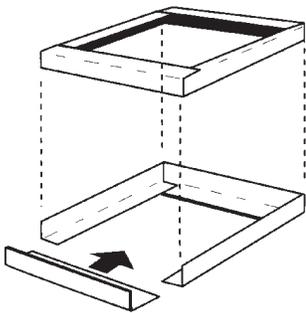

A - Stabilizing / Containment

B - Double Stacking

C - Internal Reinforcement

D - Strapping Protection

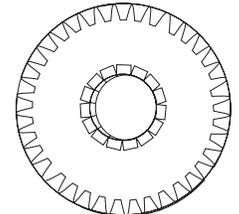

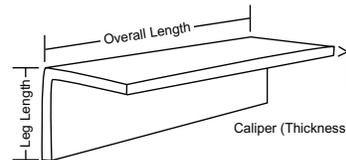

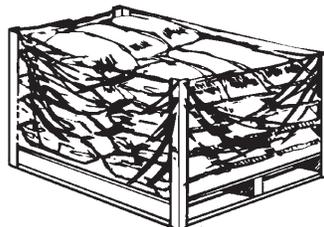

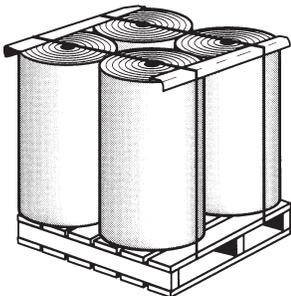

E - Roll Stock Unitizing

E - Roll Stock Unitizing

H - Dimensions / Sizing
